

Waterman Farm Buildings

Herrick Archives Numbers H 902-906

These numbers have been assigned to five buildings that were on the Waterman Farm when acquired by the University, but which are no longer standing.

Locations of these buildings are shown on the sketch map below.

For identification of other buildings shown, see Appendix A.

See Addendum No. 1

The identification of these buildings as shown on old maps and their approximate sizes are as follows:

H 902--"Concrete Block Barn" 24' x 42' = 1008 square feet

H 903--"Barn" 30' x 70' plus "L" = 2408 square feet

H 904--"Barn" 30' x 44' = 1420 square feet

H 905--"G" 15' x 17' = 255 square feet

H 906--"Corn Crib" 22' x 22' = 484 square feet

The origin of these buildings has not been determined. They were originally shown on the September 1924 map of the Waterman Farm prepared by J.C. Merrill, but were later erased. Presumably they were on the land when it was purchased by the University. Title to the property passed to the University by deed executed by Anna M. Waterman on July 2, 1923 (Deed Book 753, p. 213).

The dates of demolition have not been determined. Since they are shown on the 1928 plot plan for the Dairy Research Barn (023), they were presumably still standing in 1928. They do not appear on a 1949 plot plan for

remodeling of Buildings 008 and 023.

The plot plan for Building 330, prepared in 1932, designated Building H 904 as "Old Barn--Remove" (A). Presumably H 904 was to be removed when Building 330 was constructed but no corroborative evidence has been encountered.

No photographs of these buildings have been located.

See Addenda Nos. 2, 3

ADDENDUM NO. 2

Demolition

The Annual Report for 1929-30 states that very little had been done toward removing the old buildings because of the labor shortage. This statement is made in a paragraph dealing with the completion and occupancy of Building 023, hence it might be presumed that some of the H 902/6 buildings, possibly those east of the road, were to be removed upon completion of Building 023.

ADDENDUM NO. 3

Buildings H 902, H 903 and H 904 are clearly shown on photograph X1008 taken in the spring or early summer of 1929. The other two buildings were too small to make out clearly in this photograph.
